PropertyController.csPropertyService.cs

BusinessBusiness.Services.PropertyServiceSearchByPostcode(string query, CancellationToken ct)

```
18 message = "You cancelled request.";
19 };
20 // get token from cache.
21 var token = _memoryCache.Get<string>("token");
22
23 // send request to https://api.lookup.energy
24 var baseUrl = _configuration["LookupAPISettings:BaseUrl"];
25 var client = new RestClient(baseUrl);
26 var request = new RestRequest("/api/Property/SearchByPostcode/", Method.Post);
27 // add headers
28 request.AddHeader("accept", "text/plain");
29 request.AddHeader("Content-Type", "application/json");
30 request.AddHeader("Authorization", $"Bearer {token}");
31 // add body
32 request.AddJsonBody(new { query, isQueryTicket = true, noCache = true });
33 var response = await client.ExecuteAsync<SearchByPostcodeResponse[]>(request, ct);
34
35 // handle internal server error
36 if (response.StatusCode == HttpStatusCode.InternalServerError)
37 {
38     return new GenericResponse()
39     {
40         Message = "There is internal error."
41     };
42 }
43
44 // handle request timed out error
```
